

## Summary of board responses by sector compared to the provincial average

### Colleges & Institutes

This report summarizes the information submitted by board members in response to our survey on information use by the boards of public sector organizations. The complete report, "2009/10 Report 6 - Making the Right Decisions: Information use by the boards of public sector organizations", the guidelines, "2009/10 Part 2 of Report 6 - Guidelines: Information use by the boards of public sector organizations" and the testimonial document, "2009/10 Part 3 of Report 6 - Board Self-Reported Practices: Information use by boards of public sector organizations" can be found on our website at [www.bcauditor.com](http://www.bcauditor.com).

In accordance with Section 9 of the Auditor General Act (the Act), all information obtained from this survey has not, and will not be, communicated to anyone other than as permitted under the Act.

The information is presented to assist in the understanding of how board members in each sector feel they are performing in the area of information use. Areas where the sector is doing well, or where there is room for improvement, have been demonstrated by comparing each sector's cumulative results against the provincial average.

On the second page, there are two presentations of the board's self-assessment reported through the survey: the percent that agreed with the good practice, and the average of the responses for each good practice statement. Percent agreed represents the percentage of members who agree with the statement. The average is the average of the 5-point scale for each question (where 5=strongly agree; 4=agree; 3=neutral; 2= disagree; 1=strongly disagree).

This report summarizes the information submitted by board members in response to our survey on information use by the boards of public sector organizations. The complete report, "2009/10 Report 6 - Making the Right Decisions: Information use by the boards of public sector organizations", the guidelines, "2009/10 Part 2 of Report 6 - Guidelines: Information use by the boards of public sector organizations" and the testimonial document, "2009/10 Part 3 of Report 6 - Board Self-Reported Practices: Information use by boards of public sector organizations" can be found on our website at [www.bcauditor.com](http://www.bcauditor.com).

In accordance with Section 9 of the Auditor General Act (the Act), all information obtained from this survey has not, and will not be, communicated to anyone other than as permitted under the Act.

The information is presented to assist in the understanding of how board members in each sector feel they are performing in the area of information use. Areas where the sector is doing well, or where there is room for improvement, have been demonstrated by comparing each sector's cumulative results against the provincial average.

On the second page, there are two presentations of the board's self-assessment reported through the survey: the percent that agreed with the good practice, and the average of the responses for each good practice statement. Percent agreed represents the percentage of members who agree with the statement. The average is the average of the 5-point scale for each question (where 5=strongly agree; 4=agree; 3=neutral; 2= disagree; 1=strongly disagree).
